

# What are the 5 Key Steps to maximise your Maths performance

1. Practice some Maths, (a Paper, Mathswatch task, homework sheet, finishing off classwork....it doesn't matter what it is)

2. Mark the work

This next Step is the FIRST REALLY IMPORTANT STEP

3. Take action to resolve the questions you got wrong, (ask your Maths teacher, form tutor, friend, parent, Youtube, revision guide, just try the question again!)

4. Once you have done step 4, GO BACK AND TRY THE QUESTION AGAIN, 2 days later.

**STEP 3 AND 4, ARE WHERE THE REAL LEARNING TAKES PLACE.**

REPEAT THIS PROCESS....YOU CAN'T RUSH IT, It takes time, patience, commitment....  
it's not easy !
