

Maths Homework for Year 11

By the time our students reach year 11 they have sat at least one Maths GCSE paper and we have received feedback on their individual performances from the exam board.

Using this data, teachers construct individualised work plans for each year 11 student based on their strengths and weaknesses.

Homework set is driven by these work plans and is therefore often individual to each student.

We offer a Maths Watch CD to students at this stage so that they are able to study independently and practice questions at home.

Students also use:

www.mymaths.co.uk

GCSE Revision Guides

To support their learning.

Students are issued with past papers for examination practice and these are also available via our school portal.

Parents are encouraged to contact their child's maths teacher if they have any queries at this very important stage.
